AGAIN VICTORIOUS. Jack Dempsey Does Up Johnny Reagan on the Hudson's Historic Banks. NEW YORK, December 13th .- Jack Dempey and Johnny Regan met this morning p the Hudson river, and fought to a finish for the middle-weight championship of America and \$2,000 prize money, under the London prize ring rules. The ring was pitched near the shore, and the fight began about 8:30 o'clock. Terrific fighting was done from the start, clinching and pounding being in order. In the second round Dempsey claimed that Reagan was fouling

> Reagan accidentally spiked Dempsey in a terrible manner in the left leg. The cut was so deep the bone could be seen. There was much wrangling, Dempsey's umpire claiming the fight. The referee overruled t. however. In the fifth round the tide, which was on the flood, began to creep into the ring, and Dempsey was compelled to move partly out of his corner Still the men fought

desperately until the eighth round, which was fought with the water three inches deep all over the ring. Dempsey's leg was now in a terrible condition, and as it pained him the more he seemed to fight more desperately, if possi-ble, than before, punishing Reagan quite severely.

There was no doubt by this time that Reagan was no match for Dempsey in the matter of wrestling, as the latter had thrown his opponent with ease and vigor fight until another ring could be pitched on

THE POSTOFFICE SITE AGAIN.

A day or two ago the RECORD-UNION suggested that there might be some way out of the unfortunate dilemma which, it is supposed, postpones the erection of the Federal building in this city for four or five years. It had seemed to this journal from the beginning that the required are others who take a like view of the moss-grown law. It appears, by Senator Booth's letter, that the regulation is one Congress may suspend. That it did do so in the case of the city of Denver, and that if a proper appeal is made to Congress in behalf of Sacramento, in all probability a like privilege will be extended to us. It is said that Representative McKenna has already introduced a bill waiving the Federal demand for cession of the site until the next Legislature meets. Of course the entire delegation will support the bill, but it will be wise to give them all possible aid, for in the ples of wine submitted to Dr. E. J. Fraser's multiplicity of bills before Congress and the pressure of business upon the California delegation, this measure may be whelmed and lost. Governor Booth's letter points out that the provision regarding cession in the appropriation bill, and which appears to be a barnacle that Congress has never been able to shake off, is of no value, and is rather a hindrance to Federal work. As San Francisco is equally interested with Sacramento in this matter, we will have her co-operation in moving upon Congress to sweep this traditional stop to the way of progress aside, that when the increased appropriation for Sacramento's building is made, as Governor may begin and go on without interruption | cinnati for fraud.

to completion. Since the foregoing was in type, a dispatch from Washington recites that Representative McKenna thinks that a bil waving the proviso regarding cession of the site is unnecessary under the rulings of the Attorney-General and the Treasury De partment. It is to be hoped that Mr. Mc Kenna is correct in his view. But it will suggest itself to him that it will be wise to ecure an affirmative ruling in this case, that any doubt concerning it may be removed. If the Treasury Department declines to rule upon it, then Congress may be asked to make the waiver. As the De partment has already advised Sacramento that her building cannot be erected until the Legislature passes the bill ceding jurisdiction, the rulings referred to by Mr. Mc-Kenna must have been made since then. If so, it will not be difficult to have them applied directly to the Sacramento case.

GOVERNOR STANFORD'S bill to reform the naturalization law provides simply that when aliens are of age on arrival, they shall remain ten years in the country before they can put on the regalia o citizenship. If the alien arrives under the age of 21, then six years' residence is to be sufficient. And what is there in this that is not reasonable? If it had extended the term to twenty-one years, there are in the Union legions of voters who would express their approval at the polls, if need be. Ten years extension is a very moderate increase of the probationary term, and will not be opposed by any thoughtful people who have the best interests of republican institutions at heart.

Faster Overland Trains. The San Francisco Bulletin of last evening says: Arrangements are now being made for still better and quicker overland service by the Central and Union Pacific roads than at present. If proper under-standing can be reached with connecting lines, and necessary changes on their systems arranged, which is considered most probable, the Southern Pacific will announce a new time schedule about the 21st inst., or at the latest by the first of the year. At present one of the overland trains of the Central Pacific, which leaves this city daily in the morning, will set the traveler down in the Grand Central depot. New York, in a little more than five days. By the planned schedule a saving of time will be effected between here and Chicago, so that, according to all calculations, a traveler may go across the continent from San Francisco, to New York nent from San Francisco to New York in about four days and eighteen hours. The new schedule, as outlined, will change the time of arrival and departure of trains. The morning overland will leave here at 7 o'clock instead of 7:30, and the afternoon at 5 o'clock instead of 3 o'clock, as at pres ent. The 5 o'clock train will reach Ogden at the same time it does by the present schedule. The Central overland trains will arrive here by the new arrangement at 8:10 A. M. and 11:40 A. M., daily. The new schedule will make the through time from New York to Los Angeles by the way of Chicago, Omana, Ogden, Sacramento and Lathrop five days and twelve hours. The proposed fast time is the result largely of conferences conducted by General Passen-ger Agent Goodman while in the East, and of the fast-increasing competition of the middle overland lines with the Santa Fe and connections.

Over-Worked Women. For "worn-out," "run-down," debilita ted school teachers, milliners, seamstresses, housekeepers and over-worked women generally, Dr. Pierce's Favorite Prescription is the best of all restorative tonics. It is not a "Cure-all," but admirably fulfills a singleness of purpose, being a most potent specific for all those chronic weaknesses and diseases peculiar to women. It is a powerful, general as well as uterine, tonic and nervine, and imparts vigor and strength to the whole system. It promptly cures weakness of stomach, indigestion, bloating. weak back, nervous prostration, debility and sleeplessness, in either sex. President Argad Haraszthy presided and there were ent four others of the Commissioners and four were absent. Commissioner Krug made a report rela-

tive to the mercurial remedy for phylloxera suggested and advocated by Dr. Baur, and said that the vineyard of Mr. Hagen in Napa county which was experimented with was visited by himself, Mr. Crabb and Viticultural Officer Wheeler. They found that the remedy was a complete failure. In this vineyard of Mr. Hagen the visitors saw the Riparia—a native stock resistant to phylloxera-doing well, and the Lenor stock was also doing fairly well. Resolved, That the bonding period of brandy should be extended to five years, and that distillers should be permitted to break up packages in bond in any size required by the trade. Resolved, That imported fruit juices compounded with alcohol should be classed as alcoholic compounds and taxed as such. A special effort to secure a revision of the tariff in this respect should be made without delay. Resolved, That this Commission indorses the Green wine bill, introduced at the last session of Congress, and that if any bill is introduced to protect pure wines this session it shall be a similar one. e wine-maker should use any spirits in tortify

abandonment of State jurisdiction over soil occupied by the General Government was a relic of some ancient tradition, rather than a requisite essential at the present to the preservation of the equal balance of authority and the conservation alike of the rights of State and Federal Governments. By reference to a letter in another column from ex-United States Senator Booth, it will be seen that there are others who take a like view of the Resolved, That in the recent ruling of the Sumia wine, and secondly, his name, or the firm's name, as the case may be, both on label, or bottle, or package in which wine is sold and sent, or he may, in lieu thereof, if he so prefers and elects, affix the label which has been provided for in Section 7." Now, whereas, we recognize that there may be just grounds for the ruling of the Supreme Court in deciding that this clause may not be considered mandatory, yet we believe that a liberal construction, based upon the ordinary understanding of this portion of Section 8, would make it mandatory, conformant to what we know to have been the intention of the framers of said law. Further, that the Board agrees that the purity of California wines can only be protected by the passage of a national wine law.

SECOND ANNUAL EXHIBITION

Thursday, December 15th, at 7 P. M., Color Work......In the Library Room Drawings......In the Main Hall The public is cordially invited to visit the Art Gallery, view the work of the pupils, note the gratifying progress they have made, and by the visitation encourage this public institution and its pupils. When it is considered that the school is but barely two years of age, that most of the pupils a few months ago were beginners, it is believed the very large number of drawings and paintings to be shown will be invested with great interest. Especial attention is called to the effect of the rule requiring a thorough course in drawing to precede other advancement.

The Last Spike. A dispatch was received yesterday from Wm. H. Mills stating that the excursion to Oregon to celebrate the completion of the California and Oregon Railroad will leave San Francisco and Sacramento on Friday next at 4 P. M., and that the ceremonies at the point of junction will take place near Ashland on Saturday at 2 p. m. It is also learned that there will be but one train, the invited guests numbering about 80, and 'volunteer excursionists" all traveling by the same train. The round-trip fare will be \$25. The excursion will be entirely under the auspices of the State Board of Trade, and arrangements have been completed insuring complete success of the affair. The last rail was laid yesterday and the ceremonies will therefore not be delayed further upon the question of completion of the work. The task of building great coast route has been accomplished, herculean as it was, and Sacramento is the terminus of another extremely

important railway route. It would be well for those who desire to accompany the excursion from Sacramento to leave orders for tickets at the Southern Pacific Company's ticket office early, in order to secure sleeping accommodations.

Will not be crafted. Congestion of the lungs is noted as the exciting cause of death in twenty-two in-

will not be available until the Legislature shall code jurisdiction over the lot to the United States. This is true under the law as it stands. Congress, however, has sometimes waived this condition, or extended it until the Legislature could act, and would not doubt in this instance, if attention should be called to it. I am quite sure such a provision was inserted in the bill making an appropriation for a public building at Denver. I know it passed the Senate. In the debate, I remember that Senator Hoar commented upon the impropriety of requiring a cession of jurisdiction in any such case, saying it established little Alisatias where the process of the State would not run.

As it is now, if a man should commit any crime, from murder to petty largency, in a public building belong to the United States, he cannot be tried in a State Court. The important matter of advancing the Government building proposition by all possible means has been receiving constant attention. The Secretary of the United States Treasury has been urged to secure the forty feet adjoining the purchased building site on the east, in order that the proposed building may have ample approaches and good light from all sides—also that the plans might not be drawn contractedly and the building unsuited to

THE DEMANDS OF A GROWING CITY. The Hon. George R. Hearst, our United States Senator, having communicated with this Board and placed his services at its command on all propagant, matters bearing on the interest of solid and liquid refuse of population, it is not surprising that we should find the disnportant matters bearing on the interest of his city and locality, he was asked to give this latter his personal attention on his arrival at askington, and was also informed that a comestions of importance.

The organization of the "Sacramento City The organization of the "Sacramento City and County Improvement Association" was heartily indorsed by your Directory, because of its more general representation of all interests of this community, believing that the division and the classification of work proposed would enlist more general support, better attention, and would relieve this Board of much local work which all communities expect some organization to foster and see done. For the time the organization has existed, the good work accomplished has by visiting insanitary spots in the city, and thinks that the deficient sewerage of the

The regretted departure of Albert Gallatin, Esq., and his making another city his permanent residence, was duly embodied in a set of resolutions which were sent to him, and placed in full on your records. The banquet tendered to him was evidence that a first-class business man can secure a place of proper appreciation in his own community, second to no other department of life.

About the last important effort made by this Board during the year was recently done in materially assisting in the publication in the Chicago Inter-Ocean of several columns of important facts bearing on the interest of this locality, and the northern portion of this State. This effort has brought out much correspondence and inquiry from the East, which will result in bringing in our midst a desirable accession of people and means.

The announcement invites attention to the result of the rule requiring a thorough course in drawing as a condition precedent to painting. It is added that when it is considered nearly all the pupils a few months ago were beginners, the exhibition will prove to the public a pleasing revelation of remarkable progress.

1885–86 there were imported into New York 138,677 cases Valencia oranges, and during the season of 1886-87 (to June 1st) 60,635 cases. There was a large falling off in the dast-named season so far as Valencia oranges were concerned, for the report for the season of 1886-87 comes up to within about one month of that for the preceding season. But while there was a falling off in the Valencia crop, there was a falling off in the Valencia crop, there was a large increase for the season of 1886–87 over the preceding year in the importations from Sicily and Italy. For the earlier season the figures officially supplied show an importation of 401,886 boxes, while in the season of 1886–87 the total has risen to 1,066,277. The statistics concerning the

It seemed to an unskilled observer mable to estimate the Eastern appetite and he Eastern demand, that there were enough ranges therein stored to supply all New York and all New England for a month to come, at least. And yet one of the storeteepers said that the stock was smaller han usual. Speaking of the Florida crop, which is not stored in these houses, a geneman largely interested in the handling and sale of these goods said:

GET THE BENEFITS SECURED seems to be in this matter as it sometimes is between individuals—what is almost useless and of little value to one party may be of great value to another who can the better use it. The construction of that railroad has been a great undertaking for its projectors, calling for skill peculiar to the situation—for a great outlay of treasure and for faith in the natural demands of the transportation situation. The people of both States in general should be thankful for the faith which that modern, artificial situation has inspired, and for the great victory over nature faith which that modern, artificial situation has inspired, and for the great victory over nature which it has brought about. All honor to those who have builded so strongly, so well and so direct to what seems to be the seat of great inter-state interests of immense mutual value for inter-state traffic to two great sections of the western part of this wonderful country. During the past year the railroad improvements in our section are marked indeed, and

UNDERLIE AND GIVE STRENGTH To the prosperous condition and outlook which we have. The finishing of the California and Dregon road over the Shastas to the Willamette oregon road over the Shastas to the Willamette valley must develop a reciprocity trade of considerable extent. It will also make accessible and bring into prominence and inspection a large section of valuable country, which thus far Eastern and Pacific coast people, going to and from this country, have given but little or no attention. New timber tracts will now be accessible. New opportunities will be offered to the enterprising and new lines of railway will undoubtedly seek to serve the same great section of country, for in our own country no one railroad yet has had a lonesone time of it long. The extension of the Sacramento Valley road to Placerville is another improvement of great moment to us, for a vast section of valuable foothill, vine and fruit lands will now be brought into a state of high productiveness. New timber lands will be given a permanent value, and will prove remunerative to those who have been long waiting. The railroad building in the San Joaquin valley will also prove beneficial

to this city,
BUILDING UP NEW TOWNS And creating new and increased trade. Work will soon be pushed on the Willows line, and also the one from Sonoma valley to Napa, all being of more or less assistance to the shippers who operate from this main and most central shipping center of the State. The railroad shops here feel strongly the demands of all these enterprises, and are adapting their facilities to there feel strongly the demands of all these enterprises, and are adapting their facilities to them, and must still more extensively prepare to respond, by new buildings and a largely increased force of men.

The business of the year shows a steady improvement over last, and has been more satisfactory in several particulars. The freight rates have been more regular, and there contains the same of the same and the same are the same and the same are same as the same as the same are same are same as the same ar rates have been more regular, and there con sequently has been a better feeling of safety egarding the values of goods carried in stock. TRADE HAS BEEN REGULAR AND GENERAL, With little inclination to run to speculations Some old sections of the country show increased trade, with confidence in the future. New sec trade, with confidence in the future. New sections are opening up, and the trade from such shows a permanency of improvement, indicating that the people have gone into such localities to stay and to spend their means in the proper development of the resources of the country. Failures are much less frequent. Money has been more easy during the year. Older firms are doing an increased business, and many new ones have started in many localities, adding new firms with a fair volume of apparently new business. The trade from the State of Nevada is assuming more value and importance than it has for years. In short, it is now evident that in the part of the State tributary to this market there has been of late months a quiet, steady improvement going on, showing that many sections have had a valuable

The work in this market of gathering in and forwarding the products of this section is becoming systemized, and consequently of much local importance. Many large and small shipments of green, dried and canned fruits, vegetables, wines, flour, etc., have daily been sent out in all directions to large and small dealers here, in the interior and to San Francisco. The following are figures of car lots only, which have been shipped East by our main and heaviest shippers: There went from here 544 carloads of green fruit by passenger trains, 249 carloads by special fruit trains, and 486 carloads by freight trains; total, 1,279 carloads, being an increase of 33 per cent, over 1885, and of about 50 per cent, over 1885. Our exporters also hipped 800,000 pounds of raisins, equal to 40 arloads, of ten tons each. They were also atlled upon and supplied 582 carloads of vege-ables in car lots. These were East-bound ship-nents. They also shipped from here to the outhern portion of this State 88 carloads of regetables. MISCELLANEOUS.

Never Put Off

Till to-morrow, to-day's duty. If you have a Cold, Cough, Bronchitis, or any form of Throat or Lung disease, do not neglect it. Ayer's Cherry Pectoral, if promptly taken, will speedily relieve and cure all ailments of this character. Two years ago I took a severe Cold, which, being neglected, was followed by a terrible Cough. I lost flesh rapidly, had night sweats, and was soon confined that hight swears, and was soon confined to my bed. A physician was called, but the medicine he prescribed afforded only temporary relief. A friend advised the use of Ayer's Cherry Pectoral. I began taking this medicine, and before finishing the first bottle was able to sit up: four bottles effected a perfect was up; four bottles effected a perfect cure.

- Geo. W. Dick, Newton, Mass. In several cases of Bronchitis, caused by exposure to damp and cold weather, have used Ayer's Cherry Pectoral. It is an anodyne expectorant of great value and usefulness to patients of all ages. Its certainty of action, and its safety as a household remedy, are forcible arguments in its favor. No other cough preparation does its work so quickly and satisfactorily.—C. E. Hoyt,
